- Latin America
- Trans-Atlantic
- Trans-Pacific

Environmental Commitment

Maintains a vigilant approach to environmental management

Undertakes initiatives to reduce environmental footprint:

- ✓ Fleet renewal
- ✓ Use of low sulphur fuel
- ✓ Practice of cold-ironing
- ✓ Optimization of vessel trim, speed and routing
- ✓ Upgrading of cargo handling equipment at terminals

CO₂ emission reduced by 48% in 2016*

**Measured against APL's audited baseline set in 2009*

Vertical Expertise

SMARTreefers

A suite of reefer solutions ranging from temperature, humidity and atmosphere management, as well as cold treatment, to keep the fruits and vegetables fresh all the way

SMARTcare

Precise atmosphere management solution to prolong the freshness of commodities

SMARTcool

Proven cold treatment technique that meets strict quarantine protocols

SMARTcare+

Technologically advanced process to extend shelf-life of perishables significantly

SMARTemp

Real-time temperature and humidity tracking

Hazardous Cargo

Expert knowledge and resources available to ensure dangerous cargoes are transported safely and in full compliance with local and international regulations

Project & Oversized

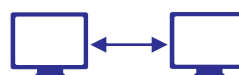

Special cargo handling facilities and equipment available to support projects, heavy and oversized shipments from origin to destination

Advanced Technology

State-of-the-art information technology and e-commerce tools available for enhanced efficiency, productivity and visibility

Electronic Data Interchange (EDI)
Electronic exchange of business information for improved data integrity and productivity

Tracking
Track and trace shipments anytime and anywhere
